## Did you know?

Alligators live in two places: the southern United States and eastern China. American alligators can be over 3 meters long and weigh up to 450 kg. They are much longer and heavier than Chinese alligators.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

When a butterfly comes out of its chrysalis, it must wait an hour or more for its wings to dry. The fastest butterfly can fly about 19 km per hour. Butterflies live on every continent except Antarctica.

www.themeasuredmom.com

## Did you know?

Dolphins communicate with each other using whistles, clicks, and other sounds. They eat fish, squid, and shrimp. The smallest dolphin is only about 50 kg, but the largest species can weigh 9,000 kg!

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The largest elephant ever weighed almost 11,000 kg. That's as much as 12 cars! The elephant is the only land mammal who can't jump. Elephants can smell water up to 19 km away.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

A group of frogs is called an army. Frogs don't drink water; they absorb it through their skin. Some tree frogs can jump fifty times their length. That's like you jumping the length of a football field!

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

A newborn giraffe is taller than most humans. Giraffes sleep standing up. And did you know that no two giraffes have the same spot pattern? Giraffes can sprint up to 56 km per hour.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The name hippopotamus means "river horse." Hippos can easily out-run humans and are considered one of the most dangerous animals in Africa.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

A green iguana can be up to seven feet long. That's longer than you! A green iguana can stay underwater for up to 30 minutes. It can live to be twenty years old.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The smallest jellyfish is smaller than the head of a pin. The largest is bigger than a person! Jellyfish don't have brains, but some have eyes. A group of jellyfish is called a smack.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

Newborn kangaroos are very tiny.  
They weigh as much as a lima bean!  
Red kangaroos can move faster than  
a racehorse. There are more kangaroos  
than humans in Australia.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The average male lion weighs about 180 kg, but the heaviest on record weighed over 360 kg! In the wild, lions rest for about twenty hours a day.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

A male moose's antlers can grow to be six feet long from tip to tip. Moose shed their antlers each year in the fall. Bears, wolves, and cougars like to hunt moose.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

Newts are amphibians. They can live to be over 25 years old, so a newt could be your pet for a long time! Most newts lay just one egg at a time. Some newts pretend to play dead when threatened.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

Orcas are often called killer whales. They don't usually attack people, but they kill large ocean animals like sea lions and whales. No animals hunt orcas! Orcas can live in both warm and icy ocean water.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The Emperor Penguin is about 1.2 meters tall, but the Little Blue Penguin is only about 45 cm in height. Penguins are very social and live in colonies of thousands.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

Quails are short, plump birds that can fly only a short distance. Females can lay 10-20 eggs at a time. They live on every continent except Antarctica.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

Wild rabbits make their homes by tunneling up to nine feet underground. They have rooms for nesting and sleeping. Rabbits can look behind them without even turning their heads.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The longest snake is the Reticulated Python. It can be 10 meters long!  
The Thread Snake is the smallest and is the length of a toothpick.  
Snakes can't chew their prey, so they swallow it whole.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The largest turtle, the leatherback sea turtle, can weigh 900 kg! A turtle cannot crawl out of its shell. Most turtles and tortoises have a large, dome-shaped shell, but the African pancake tortoise has a flat, flexible shell.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The urial is a wild sheep with reddish brown fur. Urial males have large curling horns. Females have shorter horns. The urial lives in Asia.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

There are 23 different species of vultures. They are social birds and often fly in large flocks. Vultures have excellent senses of sight and smell. They can find a dead animal from a mile or more away.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The blue whale is the largest animal the world. Its tongue can weigh as much as an elephant and its heart as much as a car. But even though it's so big, the blue whale eats tiny shrimplike creatures called krill.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

The X-ray Tetra lives in the Amazon river. You can see its backbone right through its skin. It hunts fish, worms, and crustaceans that live close to the river bed.

## Did you know?

Yaks are herd animals found in the mountains of central Asia. Many people use yaks to move heavy loads through the mountains. The yak eats grasses, herbs, and wildflowers.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?

No two zebras have the same stripes. A zebra's stripes work like camouflage, because when zebras stand in a group it's hard for predators to see how many of them there are.

© 2014 The Measured Mom™, LLC  
www.themeasuredmom.com

## Did you know?
